

1 On January 7, 2008, the court certified an overtime class.¹ Subsequently, the court granted
2 in full EDS's motion for summary judgment.² Plaintiffs appealed the court's order granting the
3 motion for summary judgment. On July 2, 2012, the Ninth Circuit affirmed that order in part and
4 reversed it in part.³ Following remand, EDS filed a motion to decertify the class.⁴ Plaintiffs
5 oppose the motion.⁵

7 I. BACKGROUND

8 A. Initial Motion for Class Certification

9 Rodney Dwyre was employed by EDS in California as a Systems Engineer and Information
10 Analyst between November 2002 and September 29, 2006.⁶ Although not alleged in the
11 complaint, Dwyre worked at an EDS facility in Rancho Cordova.⁷

12 On November 5, 2007, plaintiffs filed a motion to certify two classes.⁸ The first was a
13 class comprised of all information technology workers "employed by EDS in the state of
14

15 ¹Order Granting in Part and Denying in Part Plaintiffs' Motion for Class Certification
16 ("Class Cert. Order"), Docket No. 46 (Jan. 7, 2008).

17 ²Order Granting Defendants' Motion for Summary Judgment ("MSJ Order"); Docket No.
18 133 (June 6, 2008).

19 ³Mandate of 9th Circuit Court of Appeals ("Mandate"), Docket No. 154 (July 2, 2012).
20 Specifically, the Ninth Circuit affirmed the entry of summary judgment in EDS's favor on the
21 claims of plaintiffs Heffelfinger and Hinds, and reversed the entry of summary judgment in EDS's
22 favor on Dwyre's claims. The court remanded for further proceedings consistent with its order.

23 ⁴Motion for Order to Decertify the Class ("Motion"), Docket No. 158 (Sept. 24, 2012);
24 Reply in Support of Motion for Order to Decertify the Class ("Reply"), Docket No. 163 (Oct. 22,
25 2012).

26 ⁵Opposition to Motion for Order to Decertify the Class ("Opposition"), Docket No. 161
27 (Oct. 15, 2012).

28 ⁶Complaint, ¶ 9.

⁷Declaration of Karie Dalton ("Dalton Decl."), ¶¶ 7-9.

⁸Motion for Class Certification, Docket No. 22 (Nov. 5, 2007).

1 California who were entitled to, but were not paid, overtime in violation of California Labor Code
2 Section 510 and Wage Order No. 4-2001.”⁹ This class differed from that alleged in the complaint.
3 The court concluded that it was an improper fail-safe class and exercised its discretion to consider
4 whether it was appropriate to certify the overtime class alleged in the complaint, with slight
5 modifications. The class the court considered was comprised of “all current and former
6 employees who were employed within the State of California by [EDS] as Data Base
7 Administrators, Senior Systems Administrators, Systems Engineers, and Information Analysts
8 (hereinafter referred to collectively as ‘Information Technology Workers’) during the period
9 commencing four years prior to the filing of this Complaint and ending on the date of judgment,
10 who performed work in excess of eight hours in one day and/or forty hours in one week, and did
11 not receive overtime compensation as required by Labor Code, Section 510, and Wage Order No.
12 4-2001, Section 3 . . .” (“the overtime class”).¹⁰ It concluded that such a class satisfied the
13 numerosity, commonality, typicality, and adequacy requirements of Rule 23(a) of the Federal
14 Rules of Civil Procedure, as well as the predominance and superiority requirements of Rule
15 23(b)(3), and certified the class on that basis.¹¹

16 Plaintiffs also sought to certify a class of all information technology workers “who were
17 not provided a ten minute rest period every four hours worked as required by Section 226.7 of the
18 California Labor Code and Wage Order No. 4-2001 within three years of the filing of the
19 complaint in this case.”¹² This class too differed from that alleged in the complaint in that it added
20 language limiting the class to those who were not provided legally required breaks, omitted any
21 reference to meal breaks; and changed the class period from four to three years. The court
22 identified numerous problems with the class proposed in the motion, and once again elected to
23

24 ⁹Plaintiffs’ Memorandum of Points and Authorities in Support of their Motion for Class
25 Certification (“Pls.’ Mem.”) at 2.

26 ¹⁰Class Cert. Order at 20-23.

27 ¹¹*Id.* at 51.

28 ¹²Pls.’ Mem. at 3.

1 consider whether it was appropriate to certify the break class alleged in the complaint, eliminating
2 any reference to meal breaks, as plaintiffs’ motion did not seek certification of a meal break
3 class.¹³ The rest break class alleged in the complaint consisted of “all current or former
4 employees employed within the State of California by [EDS] as Information Technology Workers,
5 within four years of the filing of this complaint until the entry of judgment, who were not provided
6 a . . . who were not provided a ten minute rest period every four hours worked.”¹⁴ The court
7 ultimately declined to certify the rest break class, noting that plaintiffs had adduced no evidence,
8 and made no argument, that the break class satisfied the numerosity, typicality, commonality and
9 adequacy of representation requirements of Rule 23(a).¹⁵

10 Plaintiffs’ arguments in support of certification of an overtime class were based primarily
11 on the fact that EDS classified all information technology workers as exempt from state overtime
12 laws.¹⁶ They alleged that, during the “relevant time period,” Dwyre and other members of the
13 overtime class were terminated by or resigned from their employment at EDS.¹⁷ After they left
14 the company’s employ, EDS purportedly failed to pay them the overtime wages in a timely
15 fashion, entitling them to waiting penalties.¹⁸

16 **B. Statutory Framework**

17 “California Labor Code § 510 requires overtime pay for any work over eight hours in one
18 workday, over 40 hours in one workweek, or on the seventh day of work in one workweek subject
19

20 ¹³Class Cert. Order at 25. In explaining its rationale for considering the rest break class
21 alleged in the complaint, the court noted, *inter alia*, that Dwyre – now the only remaining named
22 plaintiff – did not allege that he had missed rest breaks. (*Id.*)

23 ¹⁴Complaint, ¶ 14(B).

24 ¹⁵Class Cert. Order at 30. Because the court declined to certify a rest break class, it does
25 not refer to that class further in this order.

26 ¹⁶Complaint, ¶ 25.

27 ¹⁷*Id.*, ¶ 42.

28 ¹⁸*Id.*

1 to certain exceptions.” *Sepulveda v. Wal-Mart Stores, Inc.*, 237 F.R.D. 229, 241 (C.D. Cal.
2 2006). The Industrial Welfare Commission (“IWC”) is empowered to create exceptions to these
3 statutory overtime requirements for “executive, administrative, and professional employees,
4 provided that the employee is primarily engaged in . . . duties that meet the test of the exemption,
5 customarily and regularly exercises discretion and independent judgment in performing those
6 duties, and earns a monthly salary equivalent to no less than two times the state minimum wage
7 for full-time employment.” CAL. LAB. CODE § 515(a).

8 The IWC exercised its authority to promulgate exceptions in Wage Order 4-2001. This
9 order provides that, for the administrative exemption to apply,

10 “[t]he employee must (1) perform ‘office or non-manual work directly related to
11 management policies or general business operations’ of the employer or its
12 customers, (2) ‘customarily and regularly exercise[] discretion and independent
13 judgment,’ (3) ‘perform[] under only general supervision work along specialized
14 or technical lines requiring special training’ or ‘execute [] under only general
15 supervision special assignments and tasks,’ (4) be engaged in . . . the activities
16 meeting the test for the exemption at least 50 percent of the time, and (5) earn twice
17 the state’s minimum wage.” *Eicher v. Advanced Business Integrators, Inc.*, 151
18 Cal.App.4th 1363, 1371-72 (2007) (citing 8 CAL. ADMIN. CODE
19 § 11040(A)(2)(a)(I), (b), (d), (f)).

20 Because these elements are stated in the conjunctive, “each . . . must be satisfied to find
21 the employee exempt as an administrative employee.” *Id.* at 1372.

22 California courts previously construed California’s exemption in the same manner as the
23 administrative exemption under the federal Fair Labor Standards Act (“FLSA”). See *Combs v.*
24 *Skyriver Communications, Inc.*, 159 Cal.App.4th 1242, 1255 (2008) (stating that California’s
25 administrative exemption “closely parallels the federal regulatory definition of the same exception,
26 and citing 29 U.S.C. § 213(a)(1) (“any employee employed in a bona fide executive,
27 administrative, or professional capacity” is exempt from the FLSA’s minimum wage and hour
28 requirements)); *id.* at 1256 (noting that the federal regulations are “expressly incorporated in IWC

1 Wage Order No. 4-2001”); see also *Medepalli v. Maximus, Inc.*, No. CIV. S-06-2774 FCD EFB,
2 2008 WL 958045, *5 (E.D. Cal. Apr. 8, 2008) (“IWC Wage Order No. 4-2001 expressly
3 incorporates certain regulations of the Federal Labor Standards Act (“FLSA”) effective as of the
4 date the wage order was issued”).

5 In 2011, however, the California Supreme Court determined that “only those federal
6 regulations specifically cited in [IWC’s] wage orders, and in effect at the time of promulgation of
7 these wage orders, [] apply in defining exempt duties under California law.” *Harris v. Superior*
8 *Court*, 53 Cal.4th 170, 180 (2011). The wage order states that “[t]he activities constituting
9 exempt work and non-exempt work shall be construed in the same manner as such terms are
10 construed in the following regulations under the Fair Labor Standards Act effective as of the date
11 of this order: 29 C.F.R. Sections 541.201-205, 541.207-208, 541.210, and 541.215.” 8 CAL.
12 CODE REGS. § 11040(1)(A)(2)(f).

13 The Department of Labor has promulgated regulations defining the scope of the
14 administrative exemption under the FLSA. Unlike the Wage Order, however, the federal
15 regulations include interpretative guidelines that explain the terms they use. 29 C.F.R. § 541.201,
16 for example, “is devoted to explaining the meaning of the phrase ‘directly related to management
17 policies or general business operations,’ a phrase used in the administrative exemption provisions
18 of [the Wage Order].” *Combs*, 159 Cal.App.4th at 1255. Section 541.201 provides that “[t]o
19 qualify for the administrative exemption, an employee’s primary duty must be the performance
20 of work directly related to the management or general business operations of the employer or the
21 employer’s customers.” 29 C.F.R. § 541.201(a).¹⁹ It distinguishes between work “directly
22 related to assisting with the running or servicing of the business . . . [and] work[] on a
23 manufacturing production line or selling a product in a retail or service establishment.” *Id.* at
24 1256. The regulations also identify certain categories of work that constitute “work directly
25

26 ¹⁹This language is similar to that found in the California regulations, which exempt
27 employees who are primarily engaged in the “performance of work directly related to the
28 management policies or general business operations of [their] employer or [their] employer’s
customers.” 8 CAL. CODE REGS. § 11040(1)(A)(2)(a)(i).

1 related to management or general business operations.” Such work

2 “includes, but is not limited to, work in functional areas such as tax; finance;
3 accounting; budgeting; auditing; insurance; quality control; purchasing;
4 procurement; advertising; marketing; research; safety and health; personnel
5 management; human resources; employee benefits; labor relations; public relations,
6 government relations; *computer network, internet and database administration*;
7 legal and regulatory compliance; and similar activities.” *Id.*, § 541.201(b)
8 (emphasis added).

9 The federal regulations’ interpretive guidance regarding “exercise of discretion and
10 independent judgment with respect to matters of significance” is also expressly incorporated in
11 the Wage Order. See *Combs*, 159 Cal.App.4th at 1256 (citing 29 C.F.R. § 541.202(a) & 8 CAL.
12 CODE REGS. § 11040(1)(A)(2)(f)). That regulation explains that “the exercise of discretion and
13 independent judgment involves the comparison and the evaluation of possible courses of conduct,
14 and acting or making a decision after the various possibilities have been considered.” 29 C.F.R.
15 § 541.202(a). “The term ‘matters of significance’ refers to the level of importance or
16 consequence of the work performed.” *Id.* In addition to these definitions, § 541.202(b) provides
17 a non-exhaustive list of factors to be considered in determining whether a given employee
18 exercises discretion or independent judgment. While the regulations require that “discretion and
19 independent judgment” be evaluated “in light of all the facts involved in the particular employment
20 situation . . . ,” certain of the factors identified are relevant here: (1) “whether the employee has
21 authority to formulate, affect, interpret, or implement management policies or operating
22 practices;” (2) “whether the employee carries out major assignments in conducting the operations
23 of the business;” (3) “whether the employee performs work that affects business operations to a
24 substantial degree, even if the employee’s assignments are related to operation of a particular
25 segment of the business;” (4) “whether the employee provides consultation or expert advice to
26 management;” and (5) “whether the employee investigates and resolves matters of significance
27
28

1 on behalf of management.” 29 C.F.R. § 541.202(b).²⁰

2 The regulations also address whether an employee can exercise discretion and independent
3 judgment even if he or she lacks final decision-making authority. Section 541.202 states:

4 “The exercise of discretion and independent judgment implies that the employee has
5 authority to make an independent choice, free from immediate direction or
6 supervision. However, employees can exercise discretion and independent
7 judgment even if their decisions or recommendations are reviewed at a higher level.

8 Thus, the term ‘discretion and independent judgment’ does not require that the
9 decisions made by an employee have a finality that goes with unlimited authority
10 and a complete absence of review. The decisions made as a result of the exercise
11 of discretion and independent judgment may consist of recommendations for action
12 rather than the actual taking of action. The fact that an employee’s decision may
13 be subject to review and that upon occasion the decisions are revised or reversed
14 after review does not mean that the employee is not exercising discretion and
15

16 ²⁰The section reads in full as follows:

17 “The phrase ‘discretion and independent judgment’ must be applied in the light of
18 all the facts involved in the particular employment situation in which the question
19 arises. Factors to consider when determining whether an employee exercises
20 discretion and independent judgment with respect to matters of significance include,
21 but are not limited to: whether the employee has authority to formulate, affect,
22 interpret, or implement management policies or operating practices; whether the
23 employee carries out major assignments in conducting the operations of the
24 business; whether the employee performs work that affects business operations to
25 a substantial degree, even if the employee’s assignments are related to operation of
26 a particular segment of the business; whether the employee has authority to commit
27 the employer in matters that have significant financial impact; whether the employee
28 has authority to waive or deviate from established policies and procedures without
prior approval; whether the employee has authority to negotiate and bind the
company on significant matters; whether the employee provides consultation or
expert advice to management; whether the employee is involved in planning long-
or short-term business objectives; whether the employee investigates and resolves
matters of significance on behalf of management; and whether the employee
represents the company in handling complaints, arbitrating disputes or resolving
grievances.” 29 C.F.R. § 541.202(b).

1 independent judgment.” 29 C.F.R. § 541.202(c).

2 In this context, the regulations specifically provide that a management consultant who has
3 “made a study of the operations of a business and who has drawn a proposed change in
4 organization” is exempt despite the fact that his plan is subject to review and revision by his
5 superiors before it is submitted to the client. *Id.*

6 The regulations also indicate what does not constitute the exercise of “discretion and
7 independent judgment.” The employee must do “more than . . . use [his] skill in applying well-
8 established techniques, procedures or specific standards described in manuals or other sources
9 . . . [or] perform[] other mechanical, repetitive, recurrent or routine work.” 29 C.F.R.
10 § 541.202(e).

11 In addition to administrative employees, California exempts workers in the computer
12 software field who are paid on an hourly basis if they meet the following criteria: (1) they are
13 primarily engaged in work that is intellectual or creative requiring the exercise of discretion and
14 independent judgment; (2) they are primarily engaged in the application, design, analysis, testing,
15 or creation of computer programs; (3) they are highly skilled and proficient in the theoretical and
16 practical application of specialized information to computer systems; and (4) their hourly rate of
17 pay is not less than a statutorily set minimum which is adjusted yearly to accommodate inflation.
18 See CAL. LAB. CODE § 515.5; 8 CAL. CODE REGS. § 11040(1)(A)(3)(h).

19 California’s overtime statutes are remedial in nature. Thus, exemptions are interpreted
20 narrowly to protect employees. See *Ramirez v. Yosemite Water Co., Inc.*, 20 Cal.4th 785, 794
21 (1999) (“under California law, exemptions from statutory mandatory overtime provisions are
22 narrowly construed”); *Eicher*, 151 Cal.App.4th at 1374 (“The command to interpret exemption
23 statutes narrowly to protect employees leads us to believe such an expansive interpretation is not
24 appropriate”). Furthermore, reliance on an exemption is an affirmative defense, such that the
25 employer bears the burden of proving the employee is exempt. See *Ramirez*, 20 Cal.4th at 794-
26 95.

27 **C. Class Certification, Summary Judgment, and Appeal**

28 As noted, the court’s class certification order certified a Rule 23(b)(3) overtime class

1 comprised of information technology workers employed in California by EDS during the period
2 commencing four years prior to the filing of the complaint and ending on the date of judgment,
3 who performed work in excess of eight hours in one day and/or forty hours in one week, and did
4 not receive overtime compensation as required by Labor Code § 510, and Wage Order No. 4-
5 2001, § 3.²¹ The court determined that the overtime claims of class members “present[ed] a
6 common question of law: whether software consultants working for a contractor who provides a
7 service to customers are exempt when performing the work that constitutes that service.”²² EDS
8 argued that to determine liability, it would be necessary to conduct individualized inquiries
9 concerning the tasks performed by each class member, and thus that common questions did not
10 predominate. Although acknowledging that individual workers performed unique tasks, the court
11 ultimately concluded that whether there was “a given universe of tasks, none of which falls within
12 the administrative exemption,” was a question common to all class members.²³ As a result, it
13 found that the fact that information technology workers performed varying tasks was “not relevant
14 unless some of the tasks they perform are exempt.”²⁴ It noted that “[s]hould the court, at a later
15 point, conclude that a portion of the duties performed by information technology workers are
16 exempt, then some amount of individualized inquiry will likely be required.”²⁵ The court invited
17 EDS to file a motion to decertify the class if it obtained evidence that some of the employees
18 performed exempt work.²⁶

20 ²¹Information technology workers include Data Base Administrators, Senior Systems
21 Administrators, Systems Engineers, and Information Analysts.

22 ²²Class Cert. Order at 47.

23 ²³*Id.* at 46.

24 ²⁴*Id.*

25 ²⁵*Id.*

26 ²⁶*Id.* at 46 n. 89 (“Should the evidence at some point demonstrate that [some workers
27 performed exempt tasks], EDS is entitled to bring the evidence forward to the court and ask that
28 it decertify the overtime class”).

1 Following its certification of an overtime class, on June 6, 2008, the court granted EDS's
2 motion for summary judgment. It concluded that class members performed "identical or virtually
3 identical functions;" that all class members "exercised a significant degree of discretion and
4 independent judgment with respect to matters of significance;" and therefore that all qualified as
5 exempt administrative workers.²⁷ In an effort to defeat summary judgment, plaintiffs argued that
6 class members performed individualized tasks and that not all performed exempt work. The court
7 noted that this assertion was at odds with the arguments plaintiffs had advanced in support of
8 certification of a class. It observed that plaintiffs' new argument "support[ed] decertification
9 because it undermine[d] the court's earlier conclusion that common issues of law predominate[d],
10 and suggest[ed] that an individual, fact-intensive inquiry [would] be required to determine the
11 exempt or non-exempt status of each member of the class."²⁸ The court did not address a
12 contemporaneous motion by EDS to decertify the class, however, as its entry of summary
13 judgment rendered the decertification request moot.²⁹

14 Plaintiffs appealed the court's order granting summary judgment in EDS's favor. On July
15 2, 2012, the Ninth Circuit affirmed the order in part and reversed it in part.³⁰ The court affirmed
16 the entry of summary judgment in EDS's favor on Heffelfinger's and Hinds' claims, concluding
17 that there were no triable issues of fact as to whether they performed administratively exempt
18 tasks.³¹ The court reversed the entry of summary judgment in EDS's favor on Dwyre's claims,
19 however, concluding that while some of the tasks he performed were administrative in nature,
20 others were not. As a result, the court stated, "a reasonable juror could find that Dwyre was not
21
22

23 ²⁷MSJ Order at 45.

24 ²⁸*Id.* at 45, n. 115.

25 ²⁹*Id.* at 48.

26 ³⁰Mandate at 8.

27 ³¹*Id.* at 5-6.

1 primarily engaged in qualitatively administrative work.”³² The court relied on the California
2 Supreme Court’s decision in *Harris*, which held that:

3 “[W]ork qualifies as ‘administrative’ when it is ‘directly related’ to management
4 policies or general business operations. Work qualifies as ‘directly related’ if it
5 satisfies two components. First, it must be qualitatively administrative. Second,
6 quantitatively, it must be of substantial importance to the management or operations
7 of the business. Both components must be satisfied before work can be considered
8 ‘directly related’ to management policies or general business operations in order to
9 meet the test of the exemption.” 53 Cal.4th at 181-82 (citing 29 C.F.R.
10 § 541.205(a)).

11 Relying on *Harris*’s qualitative and quantitative approach, the Ninth Circuit concluded:

12 “Dwyre’s ‘duties consisted primarily of computer programming of business
13 applications’ for the California Department of Health Services (“DHS”),’ another
14 EDS customer. Although ‘computer programmers’ and ‘systems analysts’ can be
15 administratively exempt if they perform duties such as ‘the planning, scheduling,
16 and coordination of activities which are required to develop systems for processing
17 data to obtain solutions to complex business, scientific, or engineering problems,’
18 29 C.F.R. § 541.205(c)(7), the specific kinds of duties enumerated in subsection
19 (a)(2) of the computer software field exemption, see Cal. Lab. Code § 515.5(a)(2),
20 do not in themselves constitute ‘*qualitatively*’ . . . administrative work within the
21 meaning of the administrative exemption.”³³

22 Additionally, the court noted that Dwyre worked part of the time as a Team Lead, during which
23 periods

24 “he spent part of his time assigning and coordinating work, determining schedules,
25 reviewing assignments, and running team meetings. Although duties like these fall

26
27 ³²*Id.* at 8.

28 ³³*Id.* at 7.

1 within the definition of administratively exempt work, Dwyre asserted he spent
2 ‘nowhere near 50% of [his] time’ on such activities.”³⁴

3 Consequently, the court held that triable issues of fact remained as to whether Dwyre was
4 administratively exempt.³⁵

5 The Ninth Circuit also held that the court had not abused its discretion in certifying an
6 overtime class of information technology workers, but acknowledged – as had the court – that
7 EDS had raised serious issues regarding the fact that information technology workers’ job
8 responsibilities varied. It noted that “the district court retain[ed] broad discretion to address
9 problems with the certified class, including the authority to decertify the class, in light of [the]
10 holding on appeal or for other reasons.”³⁶

11 Because the court’s entry of summary judgment in favor of EDS on Heffelfinger’s and
12 Hinds’ claims was affirmed, it is clear that they can no longer serve as class representatives.³⁷
13 Although EDS appears to contend that the class continues to include Data Base Administrators and
14 Senior Systems Engineers,³⁸ plaintiffs assert that the only issue is whether Dwyre can continue to
15 represent a class of information technology workers employed as Information Analysts and
16 Systems Engineers.³⁹ They seek to have the court modify the class definition to narrow it to these
17 two categories of workers.⁴⁰

II. DISCUSSION

A. Legal Standard Governing Decertification Under Rule 23(c)(1)(C)

Rule 23 provides that an order certifying a class “may be altered or amended before final judgment.” FED.R.CIV.PROC. 23(c)(1)(C). In *United Steel, Paper & Forestry, Rubber, Mfg. Energy, Allied Indus. & Service Workers Intern. Union, AFL-CIO, CLC v. ConocoPhillips Co.*, 593 F.3d 802 (9th Cir. 2010), the court noted that “[e]ven after a certification order is entered, the judge remains free to modify it in the light of subsequent developments in the litigation.” *Id.* at 809 (quoting *Gen. Tel. Co. of the Southwest v. Falcon*, 457 U.S. 147, 160 (1982)); see *Rodriguez v. West Publ’g Corp.*, 563 F.3d 948, 966 (9th Cir. 2009) (“A district court may decertify a class at any time”); *Cummings v. Connell*, 316 F.3d 886, 896 (9th Cir. 2003) (holding that “the district court’s approach was entirely appropriate” where it determined that a potential class “conflict was too speculative at the time [of the certification motion] to prevent finding the named plaintiffs to be adequate representatives,” but “remained willing to reconsider and decertify the class if . . . there was evidence of an actual conflict”); *Armstrong v. Davis*, 275 F.3d 849, 871 n. 28 (9th Cir.2001) (“Federal Rule of Civil Procedure 23 provides district courts with broad discretion to determine whether a class should be certified, and to revisit that certification throughout the legal proceedings before the court”).

Rule 23(c)(1)(C) recognizes that “before entry of a final judgment on the merits, a district court’s order respecting class status is not final or irrevocable, but . . . inherently tentative.” *Officers for Justice v. Civil Serv. Comm’n of City and County of San Francisco*, 688 F.2d 615, 633 (9th Cir. 1982); see also *Coopers & Lybrand v. Livesay*, 437 U.S. 463, 469 n. 11 (1978) (describing a class certification order as “inherently tentative”); *Fair Housing for Children Coalition, Inc. v. Pornchai Int’l*, No. 88-5999, 1989 WL 145401, *2 (9th Cir. Nov. 30, 1989) (Unpub. Disp.) (quoting *Officers for Justice*); *Ballard v. Equifax Check Services, Inc.*, 186 F.R.D. 589, 593 (E.D. Cal. 1999) (same). “Perhaps the main reason for the tentative nature of class status determinations is that they generally involve considerations that are closely tied to the factual and legal issues of the case.” *Officers for Justice*, 688 F.2d at 633. A court’s ability to reconsider its initial ruling regarding class certification provides the flexibility necessary to ensure

1 that “the full potential benefits flowing from the judicious use of the class action device” are
2 realized. 3 NEWBERG ON CLASS ACTIONS § 7.47 (2008). It guarantees that there is “actual, not
3 presumed, conformance with [Rule 23]. . . .” *Falcon*, 457 U.S. at 160. As a court in this district
4 has observed, reconsideration of a class certification order “serves an important role in the
5 ongoing life of [a] class action,” i.e., the opportunity to ensure “the continuing viability of the
6 class action” vehicle. *Slaven v. BP America, Inc.*, 190 F.R.D. 649, 652 (C.D. Cal. 2000).

7 Decertification is appropriate where “new facts . . . justify such a redetermination.” 6A
8 FEDERAL PROCEDURE § 12:296. While certification decisions should not focus on the merits of
9 a plaintiff’s claims, “a district court reevaluating the basis for certification may consider its
10 previous substantive rulings . . . , and . . . ‘the nature and range of proof necessary to establish
11 the [class-wide] allegations.’” *Marlo v. United Parcel Service*, 251 F.R.D. 476, 479-80 (C.D.
12 Cal. 20008) (citing *Eisen v. Carlisle and Jacquelin*, 417 U.S. 156, 178 (1974)). Because a
13 decertification motion “assists the [c]ourt in performing its role as gatekeeper, or manager, of the
14 class action,” it should not be denied simply because it is based on facts or law previously
15 considered. *Slaven*, 190 F.R.D. at 652.

16 When evaluating whether to decertify a class, “the standard . . . is the same as [for] a
17 motion for class certification: whether the Rule 23 requirements are met.” *Marlo*, 251 F.R.D.
18 at 479 (citing *O’Connor v. Boeing North Amer. Inc.*, 197 F.R.D. 404, 410 (C.D. Cal. 2000)).
19 Decertification is an issue that lies within the court’s discretion. 6A FEDERAL PROCEDURE
20 § 12:296; see also *Dukes v. Wal-Mart, Inc.*, 509 F.3d 1168, 1176 (9th Cir. 2007) (“Rule 23
21 provides district courts with broad discretion to determine whether a class should be certified and
22 to revisit that certification throughout the legal proceedings before the court. . .”), rev’d on other
23 grounds, *Wal-Mart Stores, Inc. v. Dukes*, 131 S. Ct. 2541 (2011).

24 **B. Legal Standard Governing Class Certification**

25 A district court may certify a class only if:

26 “(1) the class is so numerous that joinder of all members is impracticable; (2) there
27 are questions of law or fact common to the class; (3) the claims or defenses of the
28 representative parties are typical of the claims or defenses of the class; and (4) the

1 representative parties will fairly and adequately protect the interests of the class.”

2 FED.R.CIV.PROC. 23(a).

3 In addition, a district court must find either that at least one of the several conditions set
4 forth in Rule 23(b) is met. As the Supreme Court has explained:

5 “Rule 23(b)(1) allows a class to be maintained where ‘prosecuting separate actions
6 by or against individual class members would create a risk of’ either ‘(A)
7 inconsistent or varying adjudications,’ or ‘(B) adjudications . . . that, as a practical
8 matter, would be dispositive of the interests of the other members not parties to the
9 individual adjudications or would substantially impair or impede[] their ability to
10 protect their interests.’ Rule 23(b)(3) states that a class may be maintained where
11 ‘questions of law or fact common to class members predominate over any questions
12 affecting only individual members,’ and a class action would be ‘superior to other
13 available methods for fairly and efficiently adjudicating the controversy.’” *Dukes*,
14 131 S. Ct. at 2549 n. 2.

15 “Rule 23 does not set forth a mere pleading standard. A party seeking class certification must
16 affirmatively demonstrate his compliance with the Rule – that is, he must be prepared to prove that
17 there are *in fact* sufficiently numerous parties, common questions of law or fact, etc.” *Id.* at
18 2551. Thus, “[t]he party seeking certification bears the burden of showing that each of the four
19 requirements of Rule 23(a) and at least one requirement of Rule 23(b) have been met.” *Zinser v.*
20 *Accufix Research Institute, Inc.*, 253 F.3d 1180, 1186 (9th Cir.), amended by 273 F.3d 1266 (9th
21 Cir. 2001)); see also *Hanon v. Dataproducts Corp.*, 976 F.2d 497, 508 (9th Cir. 1992). The class
22 can be certified only if the court “is satisfied, after a rigorous analysis, that the prerequisites of
23 Rule 23(a) have been satisfied.” *Falcon*, 457 U.S. at 160-61.⁴¹

24 Although not specifically mentioned in Rule 23(a), there is an additional prerequisite to
25 certification – that the class be ascertainable. See, e.g., *Lukovsky v. San Francisco*, No. C 05-

26
27 ⁴¹The Supreme Court has noted that “[f]requently . . . ‘rigorous analysis’ will entail some
28 overlap with the merits of the plaintiff’s underlying claim. That cannot be helped.” *Dukes*, 131
S. Ct. at 2551.

1 00389 WHA, 2006 WL 140574, *2 (N.D. Cal. Jan. 17, 2006) (“Although there is no explicit
2 requirement concerning the class definition in FRCP 23, courts have held that the class must be
3 adequately defined and clearly ascertainable before a class action may proceed,” quoting *Schwartz*
4 *v. Upper Deck Co.*, 183 F.R.D. 672, 679-80 (S.D. Cal. 1999)); *Thomas & Thomas Rodmakers,*
5 *Inc. v. Newport Adhesives & Composites, Inc.*, 209 F.R.D. 159, 163 (C.D. Cal. 2002) (“Prior
6 to class certification, plaintiffs must first define an ascertainable and identifiable class. Once an
7 ascertainable and identifiable class has been defined, plaintiffs must show that they meet the four
8 requirements of Rule 23(a), and the two requirements of Rule 23(b)(3)” (citation and footnote
9 omitted)); *O’Connor*, 184 F.R.D. at 319 (holding that a class definition must be “precise,
10 objective and presently ascertainable”); *Bishop v. Saab Auto. A.B.*, No. CV 95-0721 JGD (JRx),
11 1996 WL 33150020, *4 (C.D. Cal. Feb. 16, 1996) (“To file an action on behalf of a class, the
12 named plaintiffs must be members of the class that they purport to represent at the time the class
13 action is certified. The named plaintiffs must also demonstrate that the class is ascertainable”
14 (citation omitted)).⁴²

15 Once the court determines that a class is ascertainable, it then must examine whether the
16 class meets the numerosity, commonality, typicality, and adequacy requirements of Rule 23(a).
17 If these prerequisites are met, the court must next consider whether the class is maintainable under
18 Rule 23(b). See, e.g., *Valentino v. Carter-Wallace, Inc.*, 97 F.3d 1227, 1234 (9th Cir. 1996) (“In
19

20
21 ⁴²See also, e.g., *In re A.H. Robbins Co., Inc.*, 880 F.2d 709, 728 (4th Cir. 1989) (same),
22 abrogated on other grounds by *Amchem Prods., Inc. v. Windsor*, 521 U.S. 591 (1997); *Bentley*
23 *v. Honeywell Int’l, Inc.*, 223 F.R.D. 471, 477 (S.D. Ohio 2004) (“Before delving into the
24 ‘rigorous analysis’ required by Rule 23, a court first should consider whether a precisely defined
25 class exists and whether the named plaintiffs are members of the proposed class”); *Robinson v.*
26 *Gillespie*, 219 F.R.D. 179, 183 (D. Kan. 2003) (“In determining whether to certify a class, the
27 court begins with the proposed definition of the class” because “[a]bsent a cognizable class,
28 determining whether Plaintiffs . . . satisfy the other Rule 23(a) and (b) requirements is
unnecessary” (internal quotations omitted)); *Buford v. H & R Block, Inc.*, 168 F.R.D. 340, 346
(S.D. Ga. 1996) (“Before considering the requirements of Rule 23 . . . a court must determine
whether a class exists that can adequately be defined. . . . [C]lass definition is an implicit
requirement which must be met before a Rule 23 analysis can be undertaken by the district
court”).

1 order for a class action to be certified, the plaintiffs must establish the four prerequisites of
2 Fed.R.Civ.P. 23(a) and at least one of the alternative requirements of Fed.R.Civ.P. 23(b)").

3 Plaintiffs' overtime class was certified as a Rule 23(b)(3) class, which is maintainable
4 where (i) "questions of law or fact common to the members of the class predominate over any
5 questions affecting only individual members," and (ii) "a class action is superior to other available
6 methods for fair and efficient adjudication of the controversy." FED.R.CIV.PROC. 23(b)(3).

7 "The Rule 23(b)(3) predominance inquiry tests whether the proposed classes are
8 sufficiently cohesive to warrant adjudication by representation." *Hanlon v. Chrysler Corp.*, 150
9 F.3d 1011, 1022 (9th Cir. 1998) (citing *Amchem Prods.*, 521 U.S. at 614-15). "To satisfy this
10 requirement, it is not enough simply that common questions of law or fact exist; predominance
11 is a comparative concept that calls for measuring the relative balance of common issues to
12 individual ones." *Marlo*, 251 F.R.D. at 483 (citing *Amchem Prods.*, 521 U.S. at 623-24).
13 "Implicit in the satisfaction of the predominance test is the notion that the adjudication of common
14 issues will help achieve judicial economy." *Zinser*, 253 F.3d at 1189 (citing *Valentino*, 97 F.3d
15 at 1234).

16 In determining superiority, the court must consider the four factors set forth in Rule
17 23(b)(3): (1) the interest class members have in individually controlling the prosecution or defense
18 of separate actions; (2) the extent and nature of any litigation concerning the controversy that has
19 already been commenced by or against class members; (3) the desirability or undesirability of
20 concentrating litigation of the claims in the particular forum; and (4) the difficulties that will likely
21 be encountered in managing the suit as a class action. FED.R.CIV.PROC. 23(b)(3). The last
22 requirement is commonly referred to as "manageability," and "encompasses the whole range of
23 practical problems that may render the class action format inappropriate for a particular suit." 6A
24 FEDERAL PROCEDURE § 12:244. Questions of manageability "involve[] the weighing of the
25 judicial efficiency or benefits the class action will produce against the corresponding administrative
26 complexity that may arise." *Id.* Rule 23 vests wide discretion in the district court to evaluate the
27 manageability of a Rule 23(b)(3) class action. The issue is a question "of fact and a practical
28 problem with which a district court generally has greater familiarity and expertise than does a

1 court of appeals.” *Id.* (footnotes omitted). If a district court certifies a class, but “subsequently
2 . . . becomes convinced that the litigation cannot be managed, the option of decertification is
3 available.” *Id.* (citing *In re Sch. Asbestos Litig.*, 789 F.2d 996 (3d Cir. 1986)).

4 **C. Whether Plaintiffs’ Overtime Class Should be Decertified**

5 EDS does not challenge the court’s earlier ruling that plaintiffs’ overtime class satisfies the
6 numerosity, typicality, or adequate representation requirements of Rule 23(a). The crux of its
7 argument for decertification is a contention that recent developments show that there is no
8 commonality, that common questions do not predominate, and that a class action is not a superior
9 vehicle for resolving class members’ claims.

10 **1. Commonality**

11 EDS first argues that given the court’s summary judgment ruling and the Ninth Circuit’s
12 mandate, there is no longer a common question that can be adjudicated on a classwide basis.⁴³
13 Commonality requires “questions of law or fact common to the class.” See FED.R.CIV.PROC.
14 23(a)(2). The commonality requirement is construed liberally, and the existence of some common
15 legal and factual issues is sufficient. *Jordan v. County of Los Angeles*, 669 F.2d 1311, 1320 (9th
16 Cir. 1982); accord *Hanlon*, 150 F.3d at 1019 (“The commonality preconditions of Rule 23(a)(2)
17 are less rigorous than the companion requirements of Rule 23(b)(3). Indeed, Rule 23(a)(2) has
18 been construed permissively”); see also, e.g., *Ventura v. New York City Health & Hosps. Corp.*,
19 125 F.R.D. 595, 600 (S.D.N.Y. 1989) (“Unlike the ‘predominance’ requirement of Rule 23(b)(3),
20 Rule 23(a)(2) requires only that the class movant show that a common question of law or fact
21 exists; the movant need not show, at this stage, that the common question overwhelms the
22 individual questions of law or fact which may be present within the class”). As the Ninth Circuit
23 has noted: “All questions of fact and law need not be common to satisfy the rule. The existence
24 of shared legal issues with divergent factual predicates is sufficient, as is a common core of salient
25 facts coupled with disparate legal remedies within the class.” *Hanlon*, 150 F.3d at 1019.

26 That said, the putative class “claims must depend upon a common contention – for
27

28 ⁴³Motion at 11.

1 example, the assertion of discriminatory bias on the part of the same supervisor. That common
2 contention, moreover, must be of such a nature that it is capable of classwide resolution – which
3 means that determination of its truth or falsity will resolve an issue that is central to the validity
4 of each one of the claims in one stroke.” *Dukes*, 131 S. Ct. at 2551. Although for purposes of
5 Rule 23(a)(2) even a single common question will do, *id.* at 2556, “[w]hat matters to class
6 certification . . . is not the raising of common ‘questions’ – even in droves – but, rather the
7 capacity of a classwide proceeding to generate common answers apt to drive the resolution of the
8 litigation. Dissimilarities within the proposed class are what have the potential to impede the
9 generation of common answers.” *Id.* at 2551 (citing Richard A. Nagareda, *Class Certification*
10 *in the Age of Aggregate Proof*, 84 N.Y.U. L. REV. 97, 132 (2009)). As the Ninth Circuit recently
11 offered by way of example, “it is insufficient to merely allege any common question, for example,
12 ‘Were Plaintiffs passed over for promotion?’ Instead, they must pose a question that ‘will produce
13 a common answer to the crucial question why was I disfavored.’” *Ellis v. Costco Wholesale*
14 *Corp.*, 657 F.3d 970, 981 (9th Cir. 2011) (quoting *Dukes*, 131 S. Ct. at 2552).

15 In certifying an overtime class, the court found that the commonality requirement of Rule
16 23(a) had been satisfied because “EDS’s blanket determination that all information technology
17 workers are exempt from overtime requirements suggests that there are common questions of fact
18 and law across the class.”⁴⁴ The court cited several cases that had found “the commonality
19 requirement of Rule 23(a)(2) . . . satisfied where a putative class of employees challenges the
20 employer’s classification of those employees as exempt from [the] overtime requirements under
21 state labor laws.” *Sepulveda*, 237 F.R.D. at 242 (collecting cases); see *Maddock v. KB Homes,*
22 *Inc.*, No. CV-06-05241 CAS (JTLx), 2007 WL 2221030, *4 (C.D. Cal. July 9, 2007) (finding
23 commonality satisfied where the defendant classified all potential class members as exempt from
24 state law overtime requirements); *Krzesniak v. Cendant Corp.*, No. C 05-05156 MEJ, 2007 WL
25 1795703, *8 (N.D. Cal. June 20, 2007) (“Judges from this district – in recent exempt/non-exempt
26 classification cases involving store manager claims under California law for unpaid overtime and
27

28 ⁴⁴Class Order at 27.

1 meal and rest period violations – have found sufficient commonality when the following common
2 legal and factual issues were presented: (1) whether the employer properly classified the managers
3 as exempt; (2) whether the managers share similar job duties; and (3) whether the employer
4 violated California Labor Code provisions regarding overtime, meal and rest periods, and wage
5 statements regarding employees’ hours of work” (citations omitted)); *Jimenez v. Domino’s Pizza,*
6 *Inc.*, 238 F.R.D. 241, 248-49 (C.D. Cal. 2006) (“several questions relating to the policy of
7 classifying general managers as exempt without an examination of their actual tasks and time spent
8 on those tasks are common questions of law and fact common to the proposed class members”).
9 In deciding plaintiffs’ appeal in this case, the Ninth Circuit recognized that the court had not
10 abused its discretion in certifying an overtime class because “the class members shared a common
11 question of law: whether the IT Workers’ duties constituted ‘work directly related to [the]
12 management policies or general business operations’ . . . of EDS or its customers.”⁴⁵

13 EDS does not dispute that it uniformly classifies information technology workers as
14 exempt. It argues, however, that subsequent to the court’s certification of a class, the Ninth
15 Circuit issued “bellwether decisions holding that a California overtime misclassification class
16 could not be certified based merely on a showing that the employer classified particular groups
17 of employees as exempt.”⁴⁶ EDS cites *In re Wells Fargo Home Mortg. Overtime Pay Litigation*,
18 *571 F.3d 953* (9th Cir. 2009), and *Vinole v. Countrywide Home Loans, Inc.*, *571 F.3d 935* (9th
19 Cir. 2009). In *Wells Fargo*, the Ninth Circuit held that the district court had “abused its discretion
20 in relying on [Wells Fargo’s uniform exemption] policy to the near exclusion of other factors
21 relevant to the predominance inquiry.” It determined that the district court’s approach “create[d]
22 a presumption that class certification is proper when an employer’s internal exemption policies are
23 applied uniformly to the employees,” and that “[s]uch an approach . . . disregards the existence
24 of other potential individual issues that may make class treatment difficult if not impossible.”
25 *Wells Fargo Home Mortg. Overtime Pay Litig.*, *571 F.3d* at 959. Similarly, in *Vinole*, the court

27 ⁴⁵Mandate at 8.

28 ⁴⁶Motion at 12.

1 concluded that “focusing on a uniform exemption policy alone does little to further the purpose
2 of Rule 23(b)(3)’s predominance inquiry, which requires an assessment of the relationship between
3 individual and common issues. . . . Instead of adopting what would essentially be a bright-line
4 presumption in favor of class certification, we favor an approach that takes into consideration all
5 factors that militate in favor of, or against, class certification.” *Vinole*, 571 F.3d at 946. The
6 Ninth Circuit again addressed blanket exemptions in *Marlo v. United Parcel Service, Inc.*, 639
7 F.3d 942, 948 (9th Cir. 2011), and concluded that “the existence of a policy classifying [a
8 category of workers] as exempt from overtime-pay requirements does not necessarily establish that
9 [those workers] were misclassified, because the policy may have accurately classified some
10 employees and misclassified others.”

11 Although each of these Ninth Circuit decisions addressed Rule 23(b)(3)’s predominance
12 requirement, rather than Rule 23(a)’s commonality requirement, some district courts have relied
13 on them to find that Rule 23(a)’s commonality requirement cannot be satisfied merely by showing
14 that an employer uniformly classifies certain categories of workers as exempt. See *Novak v.*
15 *Boeing Co.*, No. SACV09-01011-CJC (ANx), 2011 WL 7627789, *5 (C.D. Cal. Dec. 19, 2011)
16 (“As with these prior cases, Plaintiffs have failed to provide any evidence of commonality other
17 than that the employees were all identified as ‘Programmer/Analyst, Level 4’ and all classified by
18 Boeing as exempt. These common characteristics alone are insufficient to establish that the issue
19 of exemption, the central issue in this case, may be resolved with common proof”); *Chavez v.*
20 *Lumber Liquidators, Inc.*, No. C-09-04812 SC, 2012 WL 1004850, *5 (N.D. Cal. Mar. 26,
21 2012) (“The Court finds that none of the ‘common questions’ offered up by Plaintiffs are capable
22 of class-wide resolution. The only class-wide policy identified by Plaintiffs – the classification
23 of Store Managers as exempt – is insufficient to raise a common question. As Plaintiffs have
24 offered no common proof that Store Managers’ job requirements are consistent from day to day
25 or from store to store, the Court would need to engage in an individualized, fact-intensive analysis
26 to determine how each Store Manager spends his or her time”).

27 EDS asserts that these cases preclude a finding of commonality based on a uniform
28 exemption policy. It contends that it will be necessary to “deconstruct” the job duties performed

1 by individual class members to determine whether they are primarily engaged in administrative
2 work, and thus that there will be “myriad fact-specific questions that provide no common answers
3 under *Dukes*.”⁴⁷

4 As noted, at the time it certified a class, the court believed that the central common
5 question in the case was the legal question whether software consultants working for a contractor
6 who provides a service to customers are exempt when performing the work that constitutes that
7 service. As EDS observes, the Ninth Circuit’s decision resolves this question conclusively in its
8 favor.⁴⁸ There must thus be some other common question – whether of fact or law – that warrants
9 maintaining this case as a class action.

10 There is no dispute that class members perform different tasks as they work for different
11 EDS customers and perform different duties based on the needs of those customers. Yet EDS
12 classifies all of them as exempt. As the court noted in its original certification order, “[t]o the
13 extent that EDS believes it correctly classified all of the workers as exempt, it presumably relies
14 on common facts or legal theories to justify that decision.”⁴⁹ At the time of the original
15 certification motion, EDS adduced no evidence that it conducted individualized inquiries regarding
16 class members’ job duties before classifying them as exempt. It still has not.

17 Despite the decisions in *Chavez* and *Novak*, therefore, the court concludes that the
18

19 ⁴⁷*Id.* at 14.

20
21 ⁴⁸Reply at 1. Plaintiffs argue first that the Ninth Circuit did not resolve the question
22 because it held that some of Dywre’s duties were not qualitatively exempt. (Opposition at 8-9.)
23 This misapprehends the nature of the common legal question on which the court relied when it
24 certified a class in 2008. The question on which the court focused was whether the fact that the
25 employees performed tasks that constituted the service EDS sold meant that they could or could
26 not be classified as exempt. Plaintiffs also argue that it does not matter whether the common
27 question is one that is ultimately resolved in favor of, or against, the class. (*Id.* at 8.) While this
28 is true where the question remains unanswered throughout the pendency of the litigation, here the
Ninth Circuit has conclusively answered the common question, and it no longer needs to be
resolved. Stated differently, it is no longer a question. At this stage of the litigation, therefore,
it cannot serve as the basis for maintenance of a class action.

⁴⁹Class Cert. Order at 49.

1 commonality requirement of Rule 23(a) is satisfied. EDS has a common uniform policy of
2 classifying all information technology workers as exempt, such that they do not receive overtime
3 pay. Whether this uniform classification is or is not justified will be a common answer central to
4 resolution of the class claims as a whole. See *Pryor v. Aerotek Scientific, LLC*, 278 F.R.D. 516,
5 526 (C.D. Cal. 2011) (“The court is not wholly convinced that the alleged common policies
6 identified by Pryor justify certification of a class. . . . Nonetheless, *Dukes* made clear that a
7 single common question suffices to establish commonality. Aerotek’s witness testified that there
8 were class-wide policies and directives in effect. What these were is a common question that can
9 generate a single answer applicable to the entire class”).

10 EDS’s arguments regarding the need for individualized inquiries are more appropriately
11 considered in assessing whether the Rule 23(b)(3) predominance requirement has been met. See
12 *id.* (“The court thus concludes that the commonality requirement is met, and will address
13 Aerotek’s arguments regarding dissimilarities among class members in considering the more
14 rigorous predominance requirement”); *Gales v. Winco Foods*, No. C 09–05813 CRB, 2011 WL
15 3794887, *2, 6 (N.D. Cal. Aug. 26, 2011) (concluding that whether an employer had correctly
16 classified a group of employees as exempt was a common question, but finding that predominance
17 was not satisfied because determining whether each class member spent the majority of his or her
18 time performing exempt duties required an individualized inquiry). The court thus turns to
19 predominance requirement of Rule 23(b)(3).

20 2. Predominance

21 The predominance requirement of Rule 23(b)(3) is “far more demanding” than the
22 commonality requirement of Rule 23(a). *Amchem Prods.*, 521 U.S. at 623–24. If common
23 questions “present a significant aspect of the case and they can be resolved for all members of the
24 class in a single adjudication,” then “there is clear justification for handling the dispute on a
25 representative rather than on an individual basis,” and the predominance test is satisfied. *Hanlon*,
26 150 F.3d at 1022. “[I]f the main issues in a case require the separate adjudication of each class
27 member’s individual claim or defense, [however,] a Rule 23(b)(3) action would be
28 inappropriate.” *Zinser*, 253 F.3d at 1190 (quoting 7A Charles Alan Wright, Arthur R. Miller

1 & Mary Kay Kane, FEDERAL PRACTICE AND PROCEDURE: CIVIL 2d § 1778, at 535–39 (1986)).
2 This is because, *inter alia*, “the economy and efficiency of class action treatment are lost and the
3 need for judicial supervision and the risk of confusion are magnified.” *Id.*

4 EDS contends the Ninth Circuit determined that some portion of Dwyre’s tasks were
5 administratively exempt while others were not, and that the court will now have to engage in “a
6 series of highly fact-specific, person-by-person, week-by-week inquiries to determine whether the
7 hundreds of class members primarily performed exempt job duties.”⁵⁰ Plaintiffs counter that
8 several common issues of law and fact remain, citing evidence that “(1) class members share the
9 same job titles, job descriptions, job functions, and job codes, (2) all worked in California and
10 were subject to California law, (3) all the alleged violations occurred within the same time period,
11 (4) all class members were subject to the same policies and practices, (5) all these policies and
12 practices were established by the same decision-maker (i.e. Defendant), and (6) all the alleged
13 violations claimed by class members are similar.”⁵¹ Plaintiffs’ argument is unpersuasive.

14 In its certification order, the court noted that “[p]laintiffs [did] not dispute that individual
15 information technology workers perform different tasks. They argue[d], however, that there [was]
16 a given universe of tasks, none of which [fell] within the administrative exemption.”⁵² Based on
17 the Ninth Circuit’s decision, it is now clear that some of the tasks performed by Dwyre, while
18 acting as Team Lead, were administratively exempt – tasks such as “assigning and coordinating
19 work, determining schedules, reviewing assignments, and running team meetings.”⁵³ The Ninth
20 Circuit also concluded that information technology workers can be administratively exempt when
21 performing tasks listed in 29 C.F.R. § 541.205(c)(7).⁵⁴ The court concluded, however, that a

22
23 ⁵⁰Motion at 4.

24 ⁵¹Opposition at 11.

25 ⁵²Class Order at 46.

26 ⁵³Mandate at 7 (citing 29 C.F.R. § 542.205(c)(7)).

27 ⁵⁴29 C.F.R. § 541.205(c)(7) provides: “In the data processing field some firms employ
28 persons described as systems analysts and computer programmers. If such employees are

1 reasonable juror could find that Dwyre was not “primarily engaged in ‘qualitatively’
2 administrative work,” as he also performed duties that did not “in themselves” constitute
3 administratively exempt tasks, i.e., designing computer systems.⁵⁵ On remand, therefore, the
4 issues that must be decided are whether Dwyre performed both exempt and non-exempt tasks, and
5 if so, how much of his time was devoted to exempt, as opposed to non-exempt, work. Where the
6 critical question is how much time each putative class member spends on non-exempt activities,
7 courts have generally concluded that the predominance requirement is not met, since liability turns
8 on a fact-specific analysis of each employee’s time. See *Jimenez*, 238 F.R.D. at 252; see also
9 *Gales*, 2011 WL 3794887 at *10 (“Determining ‘how the employee actually spends his or her
10 time’ would therefore require many individualized inquiries. Accordingly, common questions do
11 not predominate over individualized ones in this case”); *Weigle v. FedEx Ground Package Sys.,*
12 *Inc.*, 267 F.R.D. 614, 622 (S.D. Cal. 2010) (denying class certification where “the amount of
13 time any particular manager spent in any particular area varies greatly”); *Trinh v. JP Morgan*
14 *Chase & Co.*, No. 07-CV-1666 W(WMC), 2008 WL 1860161, *4 (S.D. Cal. Apr. 22, 2008).

15 Plaintiffs assert the Ninth Circuit’s decision suggests that “computer programming and
16 systems analyst functions are not administratively exempt *as a matter of law*.”⁵⁶ They further

17 _____
18 concerned with the planning, scheduling, and coordination of activities which are required to
19 develop systems for processing data to obtain solutions to complex business, scientific, or
20 engineering problems of his employer or his employer’s customers, he is clearly doing work
21 directly related to management policies or general business operations.”

22 ⁵⁵Mandate at 8.

23 ⁵⁶Opposition at 9 (emphasis original). The court believes plaintiffs misread this aspect of
24 the court’s opinion. The Ninth Circuit merely held that the duties of computer programmers and
25 systems analysts described in § 541.205(c)(7) were not “in themselves” qualitatively
26 administrative. The decision leaves open the possibility that such duties can be qualitatively
27 administrative if they involve “the planning, scheduling, and coordination of activities which are
28 required to develop systems for processing data to obtain solutions to complex business, scientific,
or engineering problems.” (Mandate at 7.)

Plaintiffs also contend that EDS fails to recognize the distinction between “qualitatively”
and “quantitatively” administrative work. (Opposition at 5.) The Ninth Circuit held the record
supported an inference that Dwyre’s non-team lead duties were not qualitatively administrative.

1 _____
2 Because Dwyre submitted a declaration stating that he devoted substantially less than 50% of his
3 time to team lead duties, the court concluded that triable issues of fact remained as to whether he
4 had been properly classified. (Mandate at 8.) Based on this discussion, plaintiffs suggest there
5 is a common question as to whether the class performs “quantitatively” administrative work.
6 (Opposition at 6.) This overlooks the fact that the Ninth Circuit did not decide whether Dwyre’s
7 non-team lead work was qualitatively administrative, and that it recognized that some types of
8 computer programming and system analyst work can be qualitatively administrative. It also
9 overlooks the fact that to determine whether an individual employee’s work is quantitatively
10 administrative, the court will have to examine what class members are or were doing day-to-day
11 to determine if their job duties are or were quantitatively administrative. Work is only
12 quantitatively administrative if it is “of substantial importance to the management or operations
13 of the business.” *Rieve v. Coventry Health Care, Inc.*, 870 F.Supp.2d 856, 869 (C.D. Cal.
14 2012). As the *Harris* Court noted, whether work is of substantial importance turns on whether the
15 work “affects policy,” or “execute[s] or carr[ies] out” policy; whether the employee carries out
16 “major assignments in conducting the operations of the business”; or whether his work “affects
17 business operations to a substantial degree.” *Harris*, 53 Cal.4th at 181 n.6 (quoting 29 C.F.R.
18 541.205(c) (2000)). As plaintiffs note, the Ninth Circuit did not specifically address whether
19 Dwyre’s non-team lead duties were quantitatively administrative because it concluded that there
20 were triable issues of fact as to whether those duties were qualitatively administrative. The court,
21 in fact, left open the possibility that the duties could be found to be qualitatively administrative if
22 they involved “the planning, scheduling, and coordination of activities which are required to
23 develop systems for processing data to obtain solutions to complex business, scientific, or
24 engineering problems.” 2012 WL 2045960 at *2. (citing 29 C.F.R. § 541.205(c)(7)).

25 At the hearing, plaintiffs argued that the court was collapsing the “quantitatively
26 administrative” and “primarily engaged” standards. The court recognizes that these are separate
27 inquiries. An employee is exempt if he is primarily engaged in administratively exempt work.
28 Work qualifies as administrative when it is “directly related” to general business operations.
Harris, 53 Cal.4th at 181. Work is “directly related” only if it is both qualitatively and
quantitatively administrative. *Id.* Thus, an employee cannot be “primarily engaged” in exempt
work unless that work is both qualitatively and quantitatively administrative.

The fact that the inquiries are separate does not effect the outcome of EDS’s motion. As
noted *infra*, it will be necessary to examine each employee’s daily tasks to determine if the
employee was engaged in work that was both qualitatively and quantitatively administrative. For
example, part of Dwyre’s time was devoted to “assigning and coordinating work, determining
schedules, reviewing assignments, and running team meetings.” (Mandate at 7.) This is very
similar to the work performed by Heffelfinger and Hinds that the Ninth Circuit held was
quantitatively administrative; the court noted, for example, that Hinds’ work was quantitatively
administrative because it included “leading and coordinating operations support.” (Mandate at
6.) Thus, it is clear that Dwyre and likely other putative class members as well spend some
portion of their time performing quantitatively administrative work; as a result, the court will have
to examine the daily tasks performed by each individual to determine whether all or part of the
employee’s work is directly related to business operations. If the court determines that the

1 argue that, because they are not seeking to certify a “team lead” class, it is unnecessary to focus
2 on “which class members performed qualitatively exempt team lead duties such as those
3 performed by Dwyre.”⁵⁷ Plaintiffs contend that class members “share the same core job duties
4 and functions,” and thus that common questions still predominate.⁵⁸ Plaintiffs proffer no evidence
5 regarding the specific tasks performed by class members in varying field locations, however. The
6 simple fact that an employer classifies employees in the same category “does not eliminate the
7 need to make a factual determination as to whether class members are actually performing similar
8 duties,” however. *Campbell v. PricewaterhouseCoopers, LLP*, 253 F.R.D. 586, 603-04 (E.D.
9 Cal. 2008) (“If the duties between class members are similar, the exemption inquiry is likely
10 susceptible to common proof, . . . but if the duties are not sufficiently similar, then the inquiry
11 is unlikely to be susceptible to common proof”).

12 In contrast to its showing at the time of the motion for class certification, EDS has
13 proffered evidence in support of decertification that information analysts are given a different set
14 of responsibilities daily, and that some of the assigned tasks are exempt. Some information
15 technology analysts at Rancho Cordova, for example, function as “technical leads.”⁵⁹ Technical
16 leads are responsible for “direct[ing] the work of others” on the team, “distributing the technical
17
18

19
20 employee’s work is both qualitatively and quantitatively administrative, it will then have to
21 determine whether the employee was “primarily engaged” in such work. Each of the qualitatively
22 administrative, quantitatively administrative and “primarily engaged” inquiries will turn on the
23 specific tasks performed by each employee and the amount of time the employee spent on each
24 task.

25 ⁵⁷*Id.* To the extent plaintiffs argue that Dwyre is unique in that he acted both as an
26 information analyst and a team lead, this casts doubt on the typicality of his claim and his
27 adequacy as a class representative. As EDS does not seek decertification on these grounds,
28 however, the court need not address the issue.

26 ⁵⁸*Id.* at 12.

27 ⁵⁹Declaration of Sue Quichocho (“Quichocho Decl.”), Docket No. 158 (Sept. 24, 2012),
28 Exh. 4, ¶ 7.

1 duties to the technical team,” and “providing supervision” for the team’s work.⁶⁰ This is
2 analogous to the work performed by Dwyre that the Ninth Circuit determined was qualitatively
3 administrative – i.e., “assigning and coordinating work, determining schedules, reviewing
4 assignments.”⁶¹ As a consequence, to determine if a particular class member at Rancho Cordova
5 was properly classified, it will be necessary to examine what portion of his or her time was spent
6 on these technical lead tasks.

7 Similarly, information analysts at the Seaside facility provide high level problem-solving
8 that requires the exercise of individual discretion and judgment.⁶² Still others are involved in
9 designing database architecture for clients – e.g., the customization of a database to meet DOD’s
10 needs.⁶³ These activities involve the “planning, scheduling, and coordination of activities which
11 are required to develop systems for processing data to obtain solutions to complex . . .
12 problems.”⁶⁴ As noted, the Ninth Circuit held that such activities would be qualitatively
13 administrative. Thus, a fact-specific inquiry regarding the job responsibilities of each class
14 member at Seaside will be necessary to determine whether any of the class member’s work is
15 qualitatively administrative, and if so, whether that class member’s duties are of sufficient
16 importance to the management or operation of the business that they are quantitatively
17 administrative as well. If the court finds that both prongs are satisfied, it will then be required to
18 determine whether each employee was primarily engaged in exempt activities.

19 Class members working at the EDS facility in Irvine, California, “gathered and developed
20

21 ⁶⁰*Id.*

22
23 ⁶¹Mandate at 6 (“Dwyre spent part of his time assigning and coordinating work,
24 determining schedules, reviewing assignments, and running team meetings. . . . [D]uties like
these fall within the definition of administratively exempt work”).

25 ⁶²See Declaration of Mike Randall (“Randall Decl.”), Docket No. 158 (Sept. 24, 2012),
26 Exh. 3, ¶¶ 24-26.

27 ⁶³*Id.*, ¶ 19.

28 ⁶⁴Mandate at 7.

1 customer requirements,” and, “based on discussions they would have with the customer, the
2 Information Analysts would add information to the warranty customer’s data base.”⁶⁵ In assessing
3 the claims of plaintiff Heffelfinger, the Ninth Circuit determined that “maintaining and managing
4 . . . [a] database” qualified as “servicing a business,” and was qualitatively administrative work
5 under 29 C.F.R. § 541.205(b).⁶⁶ Thus class members in Irvine also appear to perform at least
6 some exempt tasks.⁶⁷ Information analysts in San Diego coordinated the development of a new
7 software system, and had the “authority to implement solutions and to create new software to
8
9

10
11 ⁶⁵Declaration of Jerry Ferguson (“Ferguson Decl.”), Docket No. 158 (Sept. 24, 2012),
Exh. 2, ¶ 4.

12 ⁶⁶Mandate at 3. 29 C.F.R. § 541.205(b) provides: “The administrative operations of the
13 business include the work performed by so-called white-collar employees engaged in ‘servicing’
14 a business as, for, example, advising the management, planning, negotiating, representing the
15 company, purchasing, promoting sales, and business research and control. An employee
16 performing such work is engaged in activities relating to the administrative operations of the
business notwithstanding that he is employed as an administrative assistant to an executive in the
production department of the business.”

17 Additionally, in assessing what constitutes work “directly related to [the] management
18 policies or business operations” of EDS’s clients, California law directs courts to look to federal
19 interpretive regulations. The state regulations incorporate 29 C.F.R. § 541.201(a), which
20 “provides that the phrase ‘directly related to the management or general business operations’
refers to the type of work performed by the employee.” *Combs*, 159 Cal.App.4th at 1264. Such
work “includes, but is not limited to, work in functional areas such as . . . computer network,
internet and database administration.” 29 C.F.R. § 541.201(b).

21 California courts that have addressed the question have held that employees engaged in
22 network, internet or database administration perform work “directly related to management
23 policies or business operations.” In *Combs*, for example, the court noted that Combs’ job
24 consisted, *inter alia*, of “maintaining the well being of [his employer’s] network.” *Combs*, 159
25 Cal.App.4th at 1265. Although Combs performed other tasks listed in § 541.201(b), the court
26 based its conclusion regarding the administrative nature of his job in part on Combs’ involvement
27 in network administration. *Id.* Thus, the task of maintaining the database at the Irvine facility is
“directly related” to business operations as required by the regulations and *Harris*, 53 Cal.4th at
180 (“[W]ork qualifies as ‘administrative’ when it is ‘directly related’ to management policies or
general business operations”).

28 ⁶⁷Mandate at 7.

1 enhance the functionality of the older systems.”⁶⁸ This to likely qualifies as developing a system
2 “to obtain solutions to complex . . . problems.”⁶⁹ The pattern is the same across each location
3 EDS describes. As noted, plaintiffs adduce no evidence to the contrary.

4 Thus, even assuming, as plaintiffs assert, the Ninth Circuit held that computer
5 programming and systems analyst tasks are not qualitatively administrative as a matter of law –
6 a conclusion with which, as noted, the court disagrees – factual questions would remain regarding
7 how much time individual information technology workers spent on those tasks, since the evidence
8 EDS has adduced shows that at least some class members were not engaged exclusively in
9 computer programming. See *Gales*, 2011 WL 3794887 at *8 (finding that “(1) whether certain
10 AM tasks should be characterized as exempt or non-exempt and (2) whether AMs spend more time
11 doing exempt tasks than non-exempt tasks” are distinct questions, and the latter is not susceptible
12 of common sources of proof). Moreover, if the tasks class members perform vary, a class cannot
13 survive merely because the class members have the same job title or code. See *Williams v.*
14 *Lockheed Martin Corp.*, No. 09cv1669 WQH (POR), 2011 WL 2200631, *13 (S.D. Cal. June
15 2, 2011) (“In this case, the evidence also shows that the tasks actually performed by proposed
16 class members differ[ed] across the proposed class. Therefore, the question of exemption turns
17 on the nature of the tasks actually performed by class members. The Court concludes that the
18 individualized inquiries are necessary to determine whether class members were properly
19 categorized as exempt” (internal citations omitted)).

20 Plaintiffs assert that even if the case requires analysis of particularized issues, those issues
21 can be resolved through representative proof.⁷⁰ They cite *Pina v. Con-Way Freight, Inc.*, No.
22 C 10–00100 JW, 2012 WL 1278301, *8 (N.D. Cal. Apr. 12, 2012), a case in which the court
23 certified a break class. The *Pina* court found that representative proof was sufficient because

25 ⁶⁸Declaration of Kerry McGinnis Davis (“Davis Decl.”), Docket No. 158 (Sept. 24, 2012),
26 Exh. 8, ¶ 5.

27 ⁶⁹Mandate at 7 (citing 29 C.F.R. 541.205(c)(7)).

28 ⁷⁰Opposition at 13.

1 “California law requires employers to maintain records of all information necessary to determine
2 the timing of meal breaks taken by employees,” and the defendant had utilized an “automated
3 time-keeping system.” *Id.* It concluded that “reference to these records, in addition to
4 representative testimony regarding Defendant’s practices, present[ed] a manageable method of
5 adjudicating Plaintiffs’ claims on a class basis.” *Id.*

6 *Pina* is distinguishable. Plaintiffs have adduced no evidence that EDS requires employees
7 to keep detailed time logs or that it maintains an automated or other type of detailed time-keeping
8 record, such that representative proof can be supplemented by evidence showing that various work
9 patterns were consistent across the class. The proof would have to be sufficiently specific
10 regarding the tasks performed and time spent performing them that the court could review the
11 records and determine whether each class member spent a majority of his or her time on
12 administrative work.⁷¹ A review of how each employee spent his or her time would require a
13 much more detailed and individualized analysis than analyzing whether a company allowed its
14 employees meal or rest breaks. It is not susceptible of the type of common proof plaintiffs
15 identify.⁷²

16 _____
17 ⁷¹There is some degree of record-keeping at certain EDS locations. (See Quichocho Decl.,
18 Exh. 4, ¶ 9 (“EDS employees working on the Medi-Cal account typically record their time in a
19 system known as Plan View. EDS employees working on the Medi-Cal account record their hours
20 on a daily or weekly basis. The typical expectation is that the employees would work 40 hours
21 a week”).) It does not establish, however, that employees record anything more than the number
of hours they have worked; there is no indication that employees are required to detail the tasks
they performed during the hours recorded.

22 ⁷²Plaintiffs cite *Munoz v. Giumarra Vineyards Corp.*, No. 1:09-cv-00703-AWI-JLT, 2012
23 WL 2617553 (E.D. Cal. July 5, 2012), in support of their argument. *Munoz* involved a break
24 class in which plaintiffs relied on employee time records and anecdotal evidence of company
25 policy to prove a violation of the Labor Code. See *id.* at *18. As noted, here there is no evidence
26 that time records exist that would permit the court to determine the types of tasks in which class
27 members engaged or the amount of time devoted to those tasks; yet these are the inquiries in
28 which the court would have to engage to determine the applicability of the administrative
exemption. Furthermore, anecdotal evidence would not suffice to show how each class member
apportioned her or her time. This type of evidence might perhaps have been adequate had EDS
not adduced proof that workers with the same title or job code perform different functions. EDS
has adduced such evidence, however, and anecdotal evidence will not suffice to permit the court

1 In short, while the fact that EDS classifies all information technology workers as exempt
2 presents a common issue, a “uniform exemption policy says little about the main concern in the
3 predominance inquiry: the balance between individual and common issues.” *In re Wells Fargo*,
4 571 F.3d at 958. Based on the evidence adduced by EDS, the court finds that individual issues
5 predominate, as resolution of each class member’s claim will depend on how he or she personally
6 apportioned time between or among different tasks. This, indeed, was plaintiffs’ argument in
7 opposition to EDS’s earlier summary judgment motion.

8 In deciding plaintiffs’ original motion for class certification, the court noted that “EDS
9 ha[d] the burden of showing that its employees’ job duties constitute[d] exempt work,” and
10 concluded that it had “not adequately made [such a] showing.”⁷³ In deciding EDS’s summary
11 judgment motion, by contrast, the court determined that EDS had successfully demonstrated that
12 all class members performed administratively exempt work. In reversing the court’s entry of
13 summary judgment in EDS’s favor on Dwyre’s claims, the Ninth Circuit acknowledged that he
14 performed at least some administrative work. It held, however, that there were triable issues of
15 fact as to whether he engaged primarily in qualitatively administrative work. Based on the
16 evidence EDS has now adduced regarding the job responsibilities of information analysts and
17 systems engineers, it appears that an individualized inquiry regarding the nature of each class
18 member’s duties, and the amount of time devoted to particular types of tasks, will be necessary
19 to determine whether a class member was properly or improperly classified as exempt during the
20 relevant period. Thus, plaintiffs have failed to demonstrate that common issues predominate.

21 3. Superiority

22 “Under Rule 23(b)(3), the court must evaluate whether a class action is superior by
23 examining four factors: (1) the interest of each class member in individually controlling the
24 prosecution or defense of separate actions; (2) the extent and nature of any litigation concerning
25 the controversy already commenced by or against the class; (3) the desirability of concentrating
26 _____
27 to make the determinations required as a result.

28 ⁷³Class Order at 46.

1 the litigation of the claims in a particular forum; and (4) the difficulties likely to be encountered
2 in the management of a class action.” *Edwards v. City of Long Beach*, 467 F.Supp.2d 986, 992
3 (C.D. Cal. 2006) (quoting *Leuthold v. Destination Am., Inc.*, 224 F.R.D. 462, 469 (N.D. Cal.
4 2004)).

5 On balance, this factor weighs in favor of decertification. Plaintiffs contend that
6 decertification will result in repetitious litigation, overburdened courts, and the abandonment of
7 individual claims.⁷⁴ For the reasons stated, however, adjudicating the claims in a class action will
8 not achieve markedly greater efficiency. The ultimate issue in this case – whether each class
9 member was or was not properly classified as exempt – cannot be resolved on a classwide basis,
10 but will require individualized analysis of the tasks the employee performed, and the amount of
11 time spent performing them. See *Jimenez*, 238 F.R.D. at 253 (“[B]ecause the issues presented
12 are to be determined based on an individual’s experience, testimony will vary from employee to
13 employee. . . . [S]urveys and statistics may establish whether uniform classification was improper
14 but will not be helpful in determining whether each general manager himself was wrongly
15 classified or not”); see also *Velazquez v. Costco Wholesale Corp.*, No. SACV 11-00508 JVS
16 (RNBx), 2011 WL 4891027, *7-8 (C.D. Cal. Oct. 11, 2011) (“Because the Court finds that
17 individual issues predominate over common issues, it is not necessary to address whether a class
18 action is the superior vehicle for adjudicating Plaintiffs’ claims. It is worth noting, however, that
19 the difficulties in managing a class action such as this would be great because countless individual
20 witnesses would be needed, resulting in mini-individual trials within a class trial”); *Maddock*, 248
21 F.R.D. at 248 (“Because the Court concludes that individual issues predominate in the instant
22 case, it is clear that a class action would not be superior to other methods of adjudication. For
23 these reasons, plaintiff’s motion for class certification must be DENIED”).

24 Plaintiffs offer no suggestions as to how the individual issues that predominate could be
25 adjudicated to achieve the efficiency and economy that is the goal of certifying a class. Plaintiffs,
26 of course, are not required to submit a trial plan for litigation of a class action. *Sullivan v. Kelly*

27
28 ⁷⁴Opposition at 14.

1 *Services, Inc.*, 268 F.R.D. 356, 365 (N.D. Cal. 2010) (“Nothing in Rule 23 requires Plaintiff to
2 submit a formal trial plan along with her motion for class certification,” citing *Chamberlan v.*
3 *Ford Motor Co.*, 402 F.3d 952, 961 n. 4 (9th Cir. 2005)). In the absence of one, however, the
4 court cannot envision how it would conduct hundreds of individual inquiries to determine whether
5 some or all of an employee’ job was qualitatively and quantitatively administrative, and whether
6 that employee was primarily engaged in administrative work. Although it recognizes that the cost
7 of litigating class members’ claims on an individual basis might exceed the potential recovery, the
8 court does not believe that certifying a class is superior since the individual issues to be
9 adjudicated will dominate, result in an unmanageable series of mini-trials, and consume an
10 extraordinary amount of time.

11
12 **III. CONCLUSION**

13 For the reasons stated, the court grants EDS’s motion to decertify the overtime class.

14
